Calcpad HTML report formatting (printable cheat sheet)

One command per line. Paste these inside Calcpad text comments (quotes) to format the generated HTML report.

Headings

```
<h1>Title</h1>
<h2>Section title</h2>
<h3>Subsection title</h3>
<h4>Smaller heading</h4>
<h5>Small heading</h5>
<h6>Tiny heading</h6>
```

Text styling

```
<p>Your paragraph text...</p>
<br>
<hr/>
<strong>Bold</strong>
<b>Bold</b>
<em>Italic</em>
<i>Italic</i>
<u>Underline</u>
<small>Small text</small>
<sub>sub</sub>
<sup>sup</sup>
<code>inline code</code>
<pre>preformatted text keeps line breaks</pre>
<blockquote>Quoted text</blockquote>
```

Links and images

```
<a href="https://example.com">Clickable link</a>

```

Lists

```
<ul><li>Item 1</li><li>Item 2</li></ul>
<ol><li>First</li><li>Second</li></ol>
<li>List item</li>
```

Tables

```
<table>
<tr><th>Header</th><th>Header</th></tr>
<tr><td>Cell</td><td>Cell</td></tr>
</table>
<table style="border-collapse:collapse;">
<td style="padding:6px; border:1px solid #999;">Cell</td>
```

Layout helpers

```
<div>Block container</div>
<div style="text-align:center;">Centered content</div>
<div style="text-align:right;">Right-aligned content</div>
<span>Inline container</span>
<span style="color:#1D4ED8;">Colored text</span>
<span style="font-size:14px;">Bigger text</span>
<span style="background:#FEF3C7;">Highlighted</span>
```

CSS (advanced)

```
<style>
.note { color:#6B7280; font-size: 12px; }
.box { border:1px solid #999; padding:10px; }
</style>
<div class="box">Use classes defined above</div>
```

Source note:

Calcpad README mentions support for HTML/CSS in comments and exporting reports to PDF/Word/HTML. Reference: Proektsoftbg/Calcpad README.md on GitHub (accessed January 23, 2026).
